

# SINGLE-LEVER MODE

Control all engines with one lever

---

With the Single-lever Mode it is possible to enjoy the benefit of multi-engine operation – with full shift and throttle control – using only a single lever.

## Smooth driving

With only one lever to control the speed, Single-lever Mode makes it simple to control up to four engines. The driver just presses the button and can drive safe and steady even in in rough and windy conditions. Smooth driving has never been easier.

## For multi-engine installations

The Single-lever Mode makes it possible to operate twin, triple or quadruple engine installations with only one lever.

## Increased safety

Controlling the speed with the Single lever Mode makes it simple to drive safely and steadily also in rough and windy conditions. The driver can trust the system to manage all engines while focusing on operating the boat.

# SINGLE-LEVER MODE

Control all engines with one lever

---

## Features and benefits

- Control all engines
- Activate easily with push-button
- For twin, triple or quadruple installations
