

AUTOPILOT

Autopilot with Shadow Drive provides unmatched control

The Volvo Penta Autopilot with Shadow Drive is a complete auto-steering solution – and the perfect support to the boat driver. It delivers accurate course keeping and smooth course turns at all speeds.

Shadow drive

With Shadow Drive, the Autopilot is always active and keeps the desired heading. To change course, just use the steering wheel and steer to the new heading. The Autopilot will take over as soon as the boat goes straight.

Fully integrated

The Autopilot is fully integrated with the Glass Cockpit displays and available on all helm stations on the boat. You can easily adjust the course during the trip. When the ignition is switched on, the autopilot will start and assume standby mode.

Auto guidance

This optional feature searches through all relevant charts to create a visual route for the driver to follow – and avoid shallow water, buoys and other charted obstacles. Linked with the Volvo Penta Autopilot, it will not only show the way, but also take the boat there.

AUTOPILOT

Autopilot with Shadow Drive provides unmatched control

Features and benefits

- Complete auto-steering solution
- Fully EVC-integrated
- No additional interface needed
- Easy to install
- Station handling, dimming and power on/off follow the rest of the helm station
- Intuitive user interface
- Shadow Drive
